

Arts Commons EXPLORERS CIRCLE

NOW MORE THAN EVER, OUR PLANET NEEDS OUR HELP!

Give through Explorers Circle and discover the exceptional personal rewards of supporting Arts Commons and National Geographic.

For 130 years, National Geographic has funded ground-breaking scientists and explorers and shared their findings with the world. It sponsored Explorer-in-Residence Dr. Sylvia Earl throughout a career spent expanding our knowledge of the world's fragile oceans, documented Robert Ballard's

quest to find the Titanic, and supported Jane Goodall's groundbreaking study of chimpanzees.

Your financial support helps National Geographic to explore and protect our planet by supporting the world's best scientists, photographers, journalists, and filmmakers.

Arts Commons and National Geographic believe in the power of science, exploration, and storytelling to change the world.

EXPLORERS CIRCLE RECEPTIONS

1ST RECEPTION

Speaker: Ronan Donovan - Explorer, Filmmaker & Photographer

Social By Nature

Reception: Arts Commons, Founders Room

Monday, November 5, 2018 - 5:30pm

"In the midst of the Anthropocene, I strive to create visual stories that document the plight of our changing world." ~ Ronan Donovan

What's a human? We are, at our core, social mammals. We build relationships, communicate, reproduce, establish territories, and adapt to shrinking resources. In these ways, we're no different than other social mammals. Chimpanzees, wolves, gorillas, and bears are among the most charismatic of the social mammals we know. We identify with them as species, groups, and even as named individuals. They're also under threat. Join biologist turned photographer Ronan Donovan as he talks about his work in documenting these animals and what we, as fellow social mammals, can learn from them.

2ND RECEPTION

Speaker: **Kevin Hand** - Astrobiologist

The Search for Life Beyond Earth

Reception: Arts Commons, Founders Room

Monday, January 28, 2019 - 5:30pm

"When I think about the desire to connect with life elsewhere in the universe, it gives me an incredible sense of the fragility of life here on Earth and how crucial it is to protect our collective home." - Kevin Hand

Working out of the Jet Propulsion Laboratory in Pasadena, California, Astrobiologist Kevin Hand designs instruments that will travel nearly 600 million miles from Earth to explore Europa, Jupiter's fourth largest moon, where a possible subsurface ocean is hypothesized to support life. As Principal Investigator for the NASA Astrobiology Institute's Icy Worlds Team, Hand has journeyed to study life in some of the most awesome corners of this planet, including the glaciers of Mt. Kilimanjaro, the north slope of Alaska, the interior plains of Antarctica, and – on a record-breaking dive in 2012 – the depths of the Mariana Trench. Join Kevin for a firsthand account of being on the frontline of the search for extraterrestrial life.

3RD RECEPTION

Thomas Peschak - Explorer, Photographer Speaker:

Wild Seas, Secret Shores

Arts Commons, Founders Room Reception:

Monday, March 11, 2019 - 5:30pm

"The legendary conservationist George Schaller wrote: 'Pen and Camera are weapons against oblivion; they can create awareness for that which may soon be lost forever'. I spend an average 8 months a year on assignment documenting shark conservation projects all over the world. Schaller's words are my mantra and especially in times when all hope seems lost they inspire me never to give up." ~ Thomas Peschak

To Thomas Peschak, sharks aren't a reason to get out of the water. They're a reason to get in. Following his lifelong obsession, he's found himself paddling kayaks alongside great white sharks in South Africa, swimming among hundreds of one-ton manta rays in the Maldives, and keeping pace with massive whale sharks in the Arabian Sea, Marine biologist-turned-National Geographic Photographer takes audiences around the world with his award-winning images and his engaging take on the ocean's charismatic creatures.

4TH RECEPTION

Cheryl Knott - Explorer, Biological Anthropologist Speakers:

Tim Laman - Explorer, Biologist & Photographer

Adventures Among Orangutans

Arts Commons, Founders Room Reception:

Monday, May 6, 2019 - 5:30pm

"Since orangutans only bear young about once every eight years, they can't replace their numbers fast enough. With more than 80 percent of the orangutans' habitat lost, and illegal logging expanding at an ever increasing pace, preservation efforts have become as important as research." ~ Cheryl Knott

Solitary animals living in hard-to-reach places, orangutans are one of the most difficult large land animals to study. Since 1992, husband-and-wife team Cheryl Knott and Tim Laman have been using innovative techniques and new technologies to gain a closer look at this intelligent, resourceful—and threatened—species, giving us insights not only into their world, but also our own.

All Explorers Circle events (special guests, dates, times and locations) are subject to change.

EXPLORERS CIRCLE (EC) MEMBERSHIP BENEFITS	\$100 to \$299	ASSOCIATE EXPLORER \$300	explorer \$1,200	engagement sponsor \$10,000	CUSTOM SPONSORSHIP PACKAGE
